

SENATOR MOORE: Now it costs \$17.50.

SENATOR CHAMBERS: Okay, so \$24 would be an increase over what the old...what the plate costs now, so there would be an increase. Don't you feel that more people would buy it for \$24 than will buy it for \$33?

SENATOR MOORE: I don't know if there is enough more people would buy it to generate...to make up the difference in the \$9 you are not collecting.

SENATOR CHAMBERS: Oh, so now you are not sure but your are sure that \$33 will raise more than \$48. You know that but you don't know the other.

SENATOR MOORE: I said I thought that was the case from the range of zero to 500,000.

SENATOR CHAMBERS: On the basis of what do you say that \$48, I meant \$33 will raise more than \$48, but you can't determine that \$24 would raise more than \$33, when the whole theory is that you want to reduce the price so more people will buy them. In other words, you have volume.

SENATOR MOORE: Volume and my brilliance tells me that, I guess, I don't know.

SENATOR CHAMBERS: Thank you. Thank you, then. Senator Moore sounds tired, but that little exchange shows how ridiculous the body is in what it is doing. You sit there and say lower the price so that you sell more. I want to ask Senator Kristensen a question because I think he is about as brilliant as Senator Moore.

SENATOR KRISTENSEN: Senator, I am really insulted by that little remark.

SENATOR CHAMBERS: I meant to say at least as...

SENATOR KRISTENSEN: (Interruption) get my dander up.

SENATOR CHAMBERS: See, this late in the day, I know how to bring fire and life to anybody. I can raise the dead if necessary. Senator Kristensen, if this price were reduced to \$24, do you think more people would buy this plate than those
